PLASTIC PACKAGING RECOVERY

Agrecovery is working with Elanco and MSD Animal Health to recover plastic used in veterinary medicines and ensure the future of sustainable agriculture in New Zealand

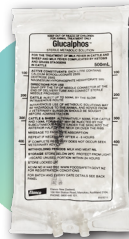

Agrecovery is developing a voluntary Product Stewardship Scheme for animal health plastic packaging. Together with Elanco and MSD Animal Health, we are recovering three further plastic product types in addition to the already established recovery of HDPE drench and chemical drums. This is the next step in a nationwide scheme that will continue to build as we expand the different plastic packaging we are able to recover.

PRODUCTS WE ARE RECOVERING FOR RECYCLING

Elanco Metabolic Solution Bags:
Calpro375, Calpromag, Glucalmag,
Glucalphos, Mag20, C.B.G 37.5,
Glucalmag, Dex40

Elanco Calpro Bolus Tubes and Lids

MSD Vaccine Vaxipaks®:
Multine, Multine B12, Nilvax,
Lamb Vaccine, Covexin 10, Toxovax,
Campyvac 4, Salvexin+B, Androvax Plus,
Footvax, Leptavoid and Yersiniavax

WHAT IS PRODUCT STEWARDSHIP?

Product Stewardship is when manufacturers, brand owners, importers and retailers accept responsibility for reducing a product's environmental impact.

It is much more than just recycling. It's a whole lifecycle approach to products, starting with the design of the packaging, through to its use and subsequent disposal to ensure the smallest environmental footprint.

It's a move away from a linear - make, take and waste economy - to a circular one, where waste is recovered, recycled and reused.

HOW THE SCHEME WILL WORK

MSD Animal Health and Elanco recovery boxes are set up at your site

Recovered plastic is collected and sent to recyclers where it will be sorted and turned into new products as part of the circular economy

Farmers drop-off their empty MSD Animal Health and Elanco plastic products into the recovery boxes

Once your recovery box is full, you simply contact Agrecovery to arrange free collection via courier

ABOUT AGRECOVERY

Agrecovery is a not-for-profit charitable trust that provides New Zealand farmers with nationwide programmes for the disposal of unwanted agrichemicals, and the recycling of empty containers, drums, IBCs and small seed, feed and fertiliser bags.

Our focus is on providing sustainable options for all farm plastics and achieving better environmental outcomes for rural communities.

We're excited to be working alongside Elanco and MSD Animal Health on a Product Stewardship Scheme for animal health plastic packaging.

Join us on the journey.
